Hindi 100%

### About me

I am a dynamic web developer proficient in JavaScript, React, and Tailwind CSS, bringing creativity and efficiency to every project. With a strong foundation in data structures and algorithms, I excel in crafting robust and responsive web solutions. My passion lies in leveraging technology to create seamless and visually appealing user experiences.

### Project

#### ViewVista App 📄

- View Vista, is a responsive movie recommendation app, utilizing SCSS, JavaScript, and React.
- Designed and implemented stylish and user-friendly interfaces for seamless navigation.
- Leveraged React for dynamic user interactions, enhancing the overall movie discovery experience.

#### Weather App 📄

The weather app show the real time temperature, humadity, wind speed. You can search any locations weather.

I use HTML CSS and JavaScript to enhance the features.

#### Hotel Booking

Leading the development of a hotel booking application using HTML, CSS, JavaScript, React, and Redux.
